

VACUFILL™

The best value for your time.

**The Most Economical
Unit to Evacuate, Test
and Refill Engine
Cooling Systems**

- ▶ Connects easily to all engine cooling systems
- ▶ Tests for leaks
- ▶ Eliminates potential airlock problems
- ▶ Quickly refills in seconds

The Vac-U-Fill is a proven engine tool that removes and refills coolant systems and performs a built-in leak test in less time than today's conventional methods.

- ▶ **Connects easily to all engine cooling systems** – Simply connect to radiator opening or reservoir tank. No need to cut heater hoses or disconnect upper radiator hoses.
- ▶ **Test for leaks** – Confirms system integrity, reduces chance of refilling a leaky system.
- ▶ **Eliminates potential airlock problems** – Refill cooling system using “Patented” vacuum technology. (Refills like OEM's) Eliminates the need for burping and warm up.
- ▶ **Refills in seconds** – Quickly refill from used or new coolant reservoir. Accurately pre-mix a 50/50 mixture of coolant in 3 gal. (11.3 L) holding reservoir.
- ▶ **Safely store used coolant** in large 12 gal. (45.4 L) holding reservoir.
- ▶ **No electrical or moving parts.** Operates completely on shop air.
- ▶ **Easy to operate.**
- ▶ **Ideal for use with coolant flush chemicals.**

- A. Easy to follow operating instructions.
- B. Only 2 valves for simple operation.
- C. Large easy to read gauge.
- D. Rugged components for shop environment.

Specifications

	Unit
Height	50" (127 cm)
Width	19" (48 cm)
Length	20" (51 cm)
Weight	49 lbs (22.3 kg)

Shop air requirements:
90 psi (6.26 ar)
4.2 cfm
